

JPH-1000 PANEL HANDLING CART

The JET JPH-1000 Panel handling cart will make moving large, cumbersome sheet goods a breeze. From unloading, to positioning for dimensional cutting the JPH-1000 acts as your silent assistant. The carriage will rise to the height of an average truck bed to assist in unloading. The 4 large pivoting casters will move over uneven and makes positioning simple. The carriage features positive locks in both the horizontal and vertical positions to ensure safety. The heavy duty tubular frame is welded to the base for added strength and security.
