

F225 Bench Model Cold Saw

The lightweight, bench model F225 is smallest cold saw in the WILTON line. It can easily be moved to various workstations to complete cutting operations throughout the shop or on the job site. Featuring durable cast iron construction, the F225 can quickly cut small solids, tubing and structural shapes, with a smooth, mill-like finish. The F225 comes standard with a double self-centering vise, flood coolant system, adjustable work stop, and full blade guard.
